

NUVISAN AT THE FOREFRONT TO FIGHT THE CORONAVIRUS

Since December 2019, over 1,6 million of cases of COVID-19 (in accordance with the applied case definitions and testing strategies in the affected countries) have been reported, including far too many casualties.

The world is currently facing a challenge unforeseen in decades.

To combat this threat, NUVISAN GmbH is fully focused on its mission: to contribute to the general health of all, not only as a service provider but also as a socially responsible business entity.

There are many ways in which we feel we can help our community fight the virus and decrease the impact it has on our society.

As a key player in the drug development arena we understand how we can influence the way things evolve for the good of all; by supporting the pharmaceutical community as we have over the last 40 years.

NUVISAN today through its [Clinical Trial Supplies Division](#) supports many ongoing studies to help identify a cure or treatment for the virus.

We are currently packaging and shipping drugs and vaccines upon the shortest possible notice to support these projects as we know we are in a race against time.

The NUVISAN business entity [INVITEK Molecular](#) contributes directly with its "Virus RNA Isolation Kits" for Molecular Diagnostic test procedures targeted against SARS-CoV-2 and has been appointed critical infrastructure status in fighting the Coronavirus by the German authorities.

NUVISAN and INVITEK are intensively working together to further expand production capacity to enable more virus tests. As such we will combine our distribution power with the quality of our kits and reagents to help with further testing and providing treatment to the ones affected.

Moreover we know as well our responsibility and the fact that we live in the same world as our employees, clients, related businesses, and NUVISAN collaborators. As such we see it as our duty to support our community in the best way possible.

NUVISAN has also made the utmost effort to provide lab coats, gloves, facemasks and other personal protection materials to nearby hospitals and care homes. Likewise, some of the nurses working in our [clinical operations](#) decided to join the National Health services to assist in their efforts and to contribute as much as one can in these critical times.

In the current difficult and challenging situation NUVISAN is proud to be a company where people are rising to the challenge we face and willing to make a difference.
